PROJECTS

HikeHide Node.js. Express.js, MongoDB, JavaScript, Bootstrap, React.js **2025**

- Architected a modular full-stack application using Express.js and MongoDB with structured controller-based logic separation.
- Developed API endpoint supporting dynamic query filtering (search, category, trending) with scalable database interaction patterns.
- Implemented asynchronous client-side search suggestions via dedicated API routes and fetch-based communication.
- Enhanced user experience through optimized DOM manipulation and responsive UI design.
- Ensure robust backend validation and secure data flow using middleware-driven request validation mechanism.

CodeCanvas Node.js. Express.js, MongoDB, JavaScript, React.js, Anti Gravity, Google Gemini API **2026**

- Architected a full-stack AI-powered resume builder with secure authentication (signup/login/logout) and structured, user-specific resume data management.
- Designed dynamic resume creation workflows enabling users to build structured sections (skills, projects, experience, education, summary) with customizable color themes using interactive palette selection.
- Integrated Google Gemini API to implement AI-assisted content enhancement features for summaries, projects, and professional descriptions.
- Leveraged Anti Gravity for smooth UI animations and enhanced user interaction, ensuring a modern and engaging user experience.

MyPortfolio React.js, Tailwind CSS, JavaScript, GSAP **2025**

- Designed and developed a fully responsive personal portfolio website using React.js and modern CSS to showcase projects and technical skills.
- Implemented GSAP animation and Scroll Trigger to create smooth entry effects and scroll-based interactions.
- Built reusable React components including animated navigation, project cards, and a responsive contact form.
